

LEXAN™ CXT FILM - PRINTED ELECTRONICS SUBSTRATE

PRINTED ELECTRONICS

LEXAN™ FILM

LEXAN™ CXT FILM offers high thermal process stability and transparency for demanding printed electronic substrates

CHALLENGE

A polycarbonate (PC) based product that combines superior optical clarity and high design flexibility with excellent thermal and dimensional stability at elevated process temperatures.

SABIC SOLUTION

SABIC has developed an innovative transparent high-heat LEXAN™ CXT film product designed to provide a high-performance and cost-efficient solution for substrates in the rapidly growing flexible printed electronics market as well as for other applications exposed to high processing and/or in-use temperatures

SUSTAINABILITY CONTRIBUTION

The higher process temperature of 196°C with LEXAN™ CXT Film product will lead to faster throughput during the converter's process; altogether resulting in less energy consumption.
